c. 1840

MALIN APARTMENTS AND COLONIAL INSURANCE

Havre de Grace, Md.

In a town where brick and frame structures predominate, this building is unusual. Colonial Insurance is a two story, two bay, rubble stone dwelling covered with stucco. Adjoining it on the east is the Malin Apartments, which has a common bond brick facade and stucco over rubble stone flanks and rear. The structure was probably one room deep originally, with the east half added as a wing at a later date. The west front room, possibly the original structure, has windows with wide sills and diagonal reveals recessed a foot and a half into the wall.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

366 Congress Avenue is a two-story, three-bay rectangular dwelling adjoining 368 Congress Avenue. Although the houses share a common wall, they are treated as separate units. The facade (north elevation) is brick, laid up in common bond; the east and south elevations are stucco over field stone. The foundation appears to be random rubble.

A modern, two-story stucco addition containing a garage and an apartment has been joined to the building at the south end, east elevation.

On the facade is a one-bay Classical Revival porch with a plain full entablature cornice and a flat roof supported by square posts with chamfered corners. The porch rests on a platform of cement and brick.

Most of the windows have six-over-six light, double-hung, pegged sash with brick flat arches over those on the facade. Although the shutters are missing, cast iron shutter fasteners in the shape of shells remain in the front wall. The east elevation windows are surrounded by stucco, but it appears they might have stone or wood lintels over them. The attic gable window is a six-light casement. The window openings on the rear (south) elevation are recessed about 18" from the face of the wall and have casement windows in them.

The entry door, located in the west bay of the facade, has a plain enframing with a four light transom; the door itself has glass in the upper panels. In the masonry above the doorway a wide stone lintel extends about 6" on either side of the transom below it, making it appear that the doorway has been reduced in size.

The ridge of the gable flank roof runs east-west (parallel to the street) with a long slope to the rear and is covered with asphalt shingles. On the facade the cornice with narrow fascia board beneath does not meet the east wall.

The house has a side hall plan; it is now divided into apartments. All the windows on the east wall first floor have wide sills and diagonal reveals recessed about 18" into the wall. An open string stairway rises from the hall on the west wall. On the west wall near the stairs is the outline of what appears to have been a door.

The house has a front lawn and small back yard.

SPECIFIC DATES

BUILDER/ARCHITECT

STATEMENT OF SIGNIFICANCE

366 Congress Avenue is architecturally significant because it is the only known building in Havre de Grace which has the unusual combination of east flank and rear of fieldstone covered with stucco and a facade of brick laid in common bond. The building adjoins a fieldstone dwelling (368 Congress Avenue) covered with stucco for which it was probably built as an addition.

The brick does not appear to be a veneer over fieldstone because the front wall of the house is only 10" thick while the rear and east flank wall are both approximately 18" thick. The land records show that by 1873, lot 178 had two different owners, so perhaps significant alternations were made to the buildings at that time to make them look like two separate dwellings.

The visual and historical significance of Congress Avenue to Havre de Grace make any building located on it important for community planning. Congress Avenue and Union Avenue are the widest streets in town, being 132' wide while the others are 70'. This house is one of three or four early to mid-19th century structures still standing in the 300 block of Congress Avenue. Robert Young Stokes laid out Havre de Grace in c. 1781. It was on Congress Avenue that sites were chosen in 1806 for the market and Episcopal Church, whose construction was financed by lottery. The north side of the 300 block of Congress Avenue is believed to be the site of the old market.
